

ANAND PAREEK

Product & Growth Leader - AI Media Generation and Editing Suite

To contribute strategic leadership in Product Management and AI Innovation by transforming emerging technologies into commercially successful products, strengthening product portfolios, and delivering sustainable business outcomes through technology-enabled innovation.

anandp.pareek6@gmail.com | +91 77385 25550 | Mumbai, India

Profile Summary

- Product & Growth leader with 6 years in AI & analytics products** — today running Fynd's AI media-generation suite (PixelBin) hands-on across strategy, solutioning, architecture and growth; earlier taking an enterprise analytics product 0→1 at Deloitte with GTM across India, Germany & Japan.
- Deep, current AI depth** — agentic pipelines, RAG, evals, MCP and multi-model workflows, built daily, in production, on GCP.
- 14 years in consulting** — strategy planning, CX strategy, business-performance improvement and AI solution design across Automotive, Industrial Products, Chemical, Pharma and FMCG; 10+ years leading teams and senior-leadership conversations.

Core Competencies

AI & LLM Applications — RAG, Evals, Agentic Workflows, MCP	LangChain, LangGraph, Prompt Engineering & Tool Calling	Product Strategy, Roadmap Planning & P&L Ownership
Cloud: GCP (production, AI architecture); AWS Bedrock (cert. Aug 2026)	Python, JavaScript, SQL, pandas; A/B Testing, Funnel & Cohort Analysis	PLG, SEO / GEO, Conversion Optimization & Product GTM
Analytics & Tooling: PostHog, GA4, Paddle, Sentry, GSC, Ahrefs, Neo4j	Claude, Codex, Custom Claude Skills, Vercel Dashboards	PRDs & Specs, Solution Architecture, Pricing & Monetization

Work Experience

Product & Growth Director | Fynd - PixelBin | October 2025 - Present

Report directly to the Founder; own the P&L, leadership reporting and product roadmap for Fynd's AI media-generation suite — 15+ tools (PixelBin, WatermarkRemover.io, Upscale.media, EraseBG).

Product Strategy & Ownership

- Repositioned point tools (watermark removal, upscaling) into a full AI media-generation platform for non-designers and beginner creators; opened MCP as a new distribution surface.
- Reset product strategy, ICP and roadmap against team capacity — 10+ releases in 3 months vs 2–3 the prior year; drove highest-ever revenue for 3 consecutive months.
- Own growth end-to-end — SEO technical & content (150+ tool pages/blogs), pricing, power-user conversion, offers and a B2B sales motion; aligned engineering, ML, growth and SEO KPIs to per-tool revenue goals.
- Mined user signals — prompt types, user profiles, model/feature usage — to prioritize features that lift conversion.

Product, Solutioning & Architecture

- Designed the end-to-end pipeline and agentic flow for a Creative Agent; led solutioning for a Marketing Studio that produces agency-grade creative end-to-end.
- Lead product design and solutioning for image & video generation across models (nanoBanana, Kling, PixVerse, Seedance) — model selection, generation workflows, I/O parameters, UX and pricing.
- Work in-depth on solution architecture with engineering on GCP — shipped working apps (UGC Ad Studio, Batch Editor); scope scalable solutions, negotiate build timelines, root-cause failures pre-release.

Apps, AI Tooling & Reliability

- Built SEO apps, growth dashboards (GA4 + PostHog + Sentry + Paddle), engineer-facing solutioning apps, a Chrome extension, and a product-design app that lets non-designers produce UI/UX faster.
- Authored 20+ custom Claude skills with deploy-ready outputs; published a public Claude skill accepted into the community “awesome Claude skills” repository by the maintainer.
- Drive scale and reliability — error dashboards, Sentry monitoring, release governance and automated tests; moved Batch Editor processing client-side → server-side; 0 customer complaints on main generation tools.

Product Lead — AI & Analytics Products | Deloitte India (within Strategy & Operations tenure) | 2020 - March 2025

No-Code Analytics Product (0→1)

- Designed a no-code analytics product with a built-in RCA engine for network-performance improvement — owned UI/UX, data model, KPIs and RCA rules; business users self-serve data, custom charts and reports.
- Took the product 0→1 — deployed with a leading auto player inside a network-profitability program.

- Led GTM end-to-end — OEM & dealer-group outreach and Deloitte-network selling in Germany & Japan; owned demos, client-management pitches, proposals and commercials.

AI & GenAI Solutions — Auto OEMs

- Led AI & GenAI strategy and solution design for a leading commercial-vehicle OEM to maximize vehicle uptime — stakeholder needs, capability assessment, cross-industry benchmarking.
- Defined outcomes, user requirements, business impact, analytical approach and UX with data-science, data-engineering and app-dev teams.
- Specified I/O parameters, workflows and solution architecture — data sources, integrations, storage & processing — on Google Cloud.
- Business & functional lead for a multi-year global AI CoE for a large Auto OEM; designed a techno-functional 'Customer Digital Twin' using ML & GenAI.

Strategy & Operations – Director | Deloitte India & PwC | March 2017 – March 2025

- Led Last-Mile Mobility strategy, strategic planning and large-scale Customer Experience Transformation for leading Indian OEMs — customer/channel research, innovation frameworks and future journeys; led retail-excellence and CX programs across multiple automotive players.
- Led a large CX transformation for a leading two-wheeler player — customer research, moments of truth, global benchmarking & SME interviews, and future-state journey design enabled through technology.
- Led multiple engagements to drive EBITDA improvement across automotive dealerships — funnel diagnostics, implementation and change management.
- Led strategic planning for a large auto-component manufacturer; designed and deployed retail-excellence and CX-enhancement programs across multiple automotive players.
- Led business development and client negotiations end-to-end; co-built an Innovation-Council-funded Sales, Marketing & Profitability analytics tool — now a top firm asset; led eminence via articles, interviews and industry events.

Strategy & Operations – Senior Consultant | KPMG India | April 2014 – February 2017

- Led 4–5 consultants on dealer profitability diagnostics across 40 dealers (200–300 bps improvement potential); deployed a CX & dealer-incentive program for a German automaker; ran manpower cost optimization (~15% reduction) for a large steel manufacturer.

Strategy & Operations – Consultant | PwC India | February 2013 – March 2014

- Led capacity/throughput enhancement, TPM and PMO projects across Pharma and Paper industries.

Education & Certifications

- **B.Tech, Aerospace Engineering — IIT Bombay** | 2007–2011 (CGPA 7/10). Conceptualized & executed Techfest, Asia's largest intercollege science & technology festival — team of 22, budget INR 10M, footfall 75,000; collaborated with AIT Thailand for the International Robotics Challenge.
- **Certifications:** IBM Data Science; Stanford Online — Machine Learning. Scheduled Aug 2026: Claude Certified Architect (CCA-F); AWS Solutions Architect – Associate.

Awards

- Deloitte: highest firm award 'President's Bonus' (twice) and 'Dot of Fame' (three times); nominated for an accelerated growth program incl. a strategic-thinking course with Tuck Business School.
- 'Above and Beyond' (KPMG & PwC) and 'Super Team' (KPMG) awards for excellence in project execution.
